

# *“Classic”* brake only hand control

## **Knob Grip Straight Handle**

*“Classic”* 3501K (68544-000)

This hand control has a knob grip that fits comfortably in the palm of the driver's hand. The knob grip and bent brake rod are standard on this unit. The bent brake rod allows mounting the handle control higher in the vehicle to provide more driver convenience and comfort. The exclusive center pivot of our controls allows the grip to be pivoted away from the door for more hand clearance and is recommended by driver evaluators. This control can be equipped with a foam handle or horn and dimmer switches by your local authorized dealer.

## **Foam Grip Straight Handle**

*“Classic”* 3501F (68554-000)

Recommended by driver evaluators, our foam grip was designed two inches longer in length than most hand controls, ensuring comfortable driving control and greater leverage when braking. Your local authorized dealer can easily install this.

## **Knob Grip Offset Handle**

*“Classic”* 3501KBX (68736-000)

This control has everything the 3500K offers plus additional features and is recommended by driver evaluators. The offset handle is fully adjustable 360° to provide additional knee clearance, more leverage, or to locate the handle closer to the turn signal. Your local authorized dealer can easily install these items.

## **Foam Grip Offset Handle**

*“Classic”* 3501FBX (68738-000)

This control has everything the 3500F offers plus additional features and is recommended by driver evaluators. The offset handle is fully adjustable 360° to provide additional knee clearance, more leverage, or to locate the handle closer to the turn signal. Your local authorized dealer can easily install these items.
