

55 Series

Model 5500

Our 5500 series is quickly becoming the best selling model in the Med-Lift line. This chair offers outstanding comfort along with many unique features at a great value.

The highlights of this model are the TV Position (*legs fully extend before the back starts to recline*) and the space-saving wall-away feature, which allows you to place this chair 3-1/2" from the wall and still recline without the worry of damaging the chair or wall. Designed to match almost any decor. Standard with battery backup in case of power failure. (battery backup not available on 2, 4, or 6 vib/heat or Ultra Ezz III massage system)

55 Series MODEL 5555

The 55 Series is also available in a full sleeper (Model 5555). When choosing this option, please note that the wall-away recline feature is NOT available.
