MOBILITY

BENTLEY

The Bentley is a manual tilt-in-space wheelchair that tilts 20 degrees from the front, making it an excellent choice for positioning and allowing the user to keep their feet on the ground even while the chair is tilted. It is the ideal wheelchair for people who are highly agitated.

A Ideal for foot propulsion

No knee rise is ideal for foot propulsion.

B Ideal for hand propulsion

Adjustable wheel position allows for easy arm access.

C Adjustable seat height, seat depth, back angle and rear wheel

Accommodates a variety of patient needs for optimal performance.

D Shock absorbers

Provide maximum comfort and protection.

Features

20° of manual tilt without knee rise	Short wheelbase for maneuverability
Adjustable wheel location	Spring back for comfort and protection
Foot and hand propel in tilted position	Transit tie-down
Low seat-to-floor height	Variety of casters, front riggings and wheel sizes
Rugged construction for heavy use
