

eMotion A.P.T. Series

Manufactured by

Alternating Pressure

The eMotion system provides active pressure redistribution by using a 3-in-1 alternating pressure cycle. This results in a comfortable, effective therapy for your patients. The mattress has an 8" air bladder with cell in cell (4.5" of therapy, 3.5" of static) to provide this therapeutic alternating pressure, and allows the mattress to stay inflated in a power outage.

Adjustable to Patient's Needs

With adjustable comfort settings, variable cycle times, and a Max inflate option, the patient's comfort is totally customizable. Fowler Boost adds extra air pressure when patients are sitting up, and also prevents bottoming out. Design includes an 8" heel section and head pillow for added comfort.

Low Air Loss

The effective micro low air loss addresses moisture management, and the interchangeable air cell design provides easy cleaning.

Specifications

Cover Type	Top: Nylon coated with PU + Single quilting Base: Polyester laminated with PVC, with adjustable safety straps
Size	80" x 36" x 8" (203 cm x 91.4 cm x 20 cm)
Product Weight	16.3 lbs (7.4 kg)
Patient Weight Limit	440 lbs (200 kg)
Warranty	36-Month Warranty
