- 2 hours Charging time

- 18 month warranty

VirtuCLEAN, a waterless PAP cleaning alternative

Proper cleaning of CPAP/Bi-Level equipment requires daily cleaning of your patients mask, and changing humidifier water. Your patient will also normally be required to clean their tubing and humidifier chamber with soap and water weekly. Studies show that patients rarely adhere to this vigorous schedule which can lead to bacteria and mold accumulation in their CPAP/Bi-Level system, causing various health complications.

Now, with VirtuOx's VirtuCLEAN your patients can properly disinfect their CPAP/Bi-Level device and equipment!

To use this device, simply plug in your CPAP/Bi-Level to the VirtuCLEAN, turn the VirtuCLEAN on, and walk away. The VirtuCLEAN will automatically clean your system using Ozone, also known as activated oxygen, in only 30 minutes.

Where do you want to clean your PAP?

MANUAL CLEANING:
