

MAXORB® II WOUND DRESSINGS

More absorbency. More strength.

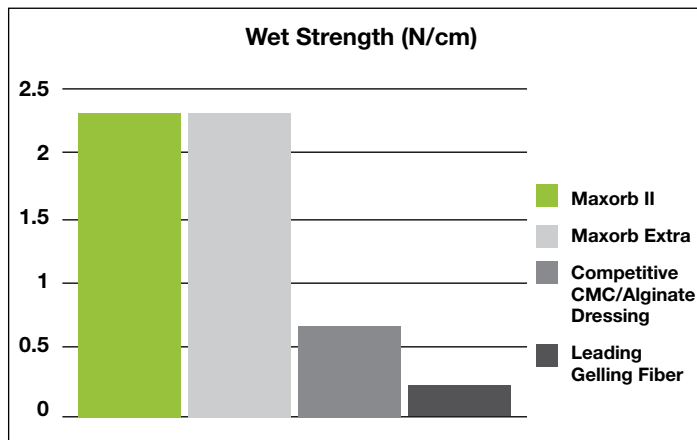

Exceptional care for moderate to heavily draining wounds

Maxorb II is stronger and more absorbent than the competition.

Maxorb II is 70% more absorbent than the leading gelling fiber product and 40% more absorbent than Maxorb Extra.

Maxorb II delivers more than three times the wet strength of competitors.

Moisture management for challenging wounds

Ultra-absorptive, 100% alginate manages drainage, keeping periwound skin drier and less susceptible to maceration while providing a beneficial, moist wound environment.

Wet-strength integrity keeps Maxorb II material from coming apart for easier, more comfortable dressing changes and less residual material left in the wound.

Medline Educational Packaging offers all the step-by-step information you need for proper dressing application ensuring that your patients and facility get the best performance Maxorb II has to offer.

Indications for Use:

- Moderate to heavily exuding partial to full thickness wounds
- Post-operative wounds
- Trauma wounds
- Ulcers: leg, pressure, diabetic
- Graft and donor sites
- 1st and 2nd degree burns

Call your Medline representative for a sample of Maxorb II alginate wound dressing.
