

**PRODUCT BENEFITS:** Coenzyme Q-10 plays an essential role in the production of cellular ATP and cardiovascular health maintenance.\* By supporting the normal physiologic function of the heart, Co Q-10 promotes healthy circulation through myocardial tissue.\* Co Q-10 is a lipophilic antioxidant which neutralizes the formation of free radicals to support tissue from oxidative damage.\*

*Statin medications can reduce Co Q-10 levels in the body. Co Q-10 can replenish what Statin medications may deplete.\* Note: Coenzyme Q-10 is not intended to serve as a replacement for Statin therapy, nor should you discontinue taking any prescribed medications while supplementing with Co Q-10.*

**Directions:** For adults, take one (1) softgel twice daily, preferably with meals or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.
