

# ***Tracer<sup>®</sup> SX5***

**DEALER:** This manual **MUST** be given to the user of the wheelchair.

**USER:** BEFORE using this wheelchair, read this manual and save for future reference.

For more information regarding  
Invacare products, parts, and services,  
please visit [www.invacare.com](http://www.invacare.com)

**Yes, you can.<sup>®</sup>**

---

## **WARNING**

**A QUALIFIED TECHNICIAN MUST PERFORM THE INITIAL SET UP OF THIS WHEELCHAIR. ALSO, A QUALIFIED TECHNICIAN MUST PERFORM ALL PROCEDURES SPECIFICALLY INDICATED IN THE MANUAL.**

**DO NOT USE THIS PRODUCT OR ANY AVAILABLE OPTIONAL EQUIPMENT WITHOUT FIRST COMPLETELY READING AND UNDERSTANDING THESE INSTRUCTIONS AND ANY ADDITIONAL INSTRUCTIONAL MATERIAL SUCH AS OWNER'S MANUALS, SERVICE MANUALS OR INSTRUCTION SHEETS SUPPLIED WITH THIS PRODUCT OR OPTIONAL EQUIPMENT. IF YOU ARE UNABLE TO UNDERSTAND THE WARNINGS, CAUTIONS OR INSTRUCTIONS, CONTACT A HEALTHCARE PROFESSIONAL, DEALER OR TECHNICAL PERSONNEL BEFORE ATTEMPTING TO USE THIS EQUIPMENT - OTHERWISE, INJURY OR DAMAGE MAY OCCUR.**

---

## **ACCESSORIES WARNING**

**Invacare products are specifically designed and manufactured for use in conjunction with Invacare accessories. Accessories designed by other manufacturers have not been tested by Invacare and are not recommended for use with Invacare products.**

---

*NOTE: Updated versions of this manual are available on [www.invacare.com](http://www.invacare.com).*

# REGISTER YOUR PRODUCT

The benefits of registering include:

1. Safeguarding your investment.
2. Ensuring long-term maintenance and servicing of your product.
3. Receiving updates with product information, maintenance tips and industry news.

**Register ONLINE at [warranty.invacare.com](http://warranty.invacare.com)**

Please have your model number and purchase date available to complete your registration.

Any registration information you submit will only be used by Invacare Corporation and protected as required by applicable laws and regulations.

## SPECIAL NOTES

Signal words are used in this manual and apply to hazards or unsafe practices which could result in personal injury or property damage. Refer to the following table for definitions of the signal words.

SIGNAL WORD	MEANING
DANGER	Danger indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.
WARNING	Warning indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.
CAUTION	Caution indicates a potentially hazardous situation which, if not avoided, may result in property damage or minor injury or both.

### NOTICE

**THE INFORMATION CONTAINED IN THIS DOCUMENT IS SUBJECT TO CHANGE WITHOUT NOTICE.**

#### WHEELCHAIR USER

As a manufacturer of wheelchairs, Invacare endeavors to supply a wide variety of wheelchairs to meet many needs of the end user. However, final selection of the type of wheelchair to be used by an individual rests solely with the user and his/her healthcare professional capable of making such a selection.

#### WHEELCHAIR TIE-DOWN RESTRAINTS AND SEAT RESTRAINTS

Wheelchair users should **NOT** be transported in vehicles of any kind while in wheelchairs. As of this date, the Department of Transportation has not approved any tie-down systems for transportation of a user while in a wheelchair, in a moving vehicle of any type.

It is Invacare's position that users of wheelchairs should be transferred into appropriate seating in vehicles for transportation and use be made of the restraints made available by the auto industry. Invacare cannot and does not recommend any wheelchair transportation systems.

#### SEAT POSITIONING STRAP

**ALWAYS** wear your seat positioning strap. Inasmuch as the seat positioning strap is an option on this wheelchair (you may order with or without the seat positioning strap), Invacare strongly recommends ordering the seat positioning strap as an additional safeguard for the wheelchair user. The seat positioning strap is a positioning strap only. It is not designed for use as a safety device withstanding high stress loads such as auto or aircraft safety belts. If signs of wear appear, strap **MUST** be replaced **IMMEDIATELY**.

With regards to seat/chest positioning straps - it is the obligation of the DME dealer, therapists and other healthcare professionals to determine if a seat/chest positioning strap is required to ensure the safe operation of this equipment by the user. Serious injury can occur in the event of a fall from a wheelchair.

# LABEL LOCATION

NO WHEELCHAIR HAS BEEN APPROVED FOR USE AS A SEATING SURFACE WITHIN A MOTOR VEHICLE. THIS LABEL IS FOR INFORMATIONAL PURPOSES ONLY. LIABILITY ISSUES WERE NOT CONSIDERED IN THE ATTACHMENT OF THIS LABEL.

AUCUN FAUTEUIL ROULANT N'A ÉTÉ APPROUVÉ POUR ÊTRE UTILISÉ COMME SIÈGE À L'INTÉRIEUR D'UN VÉHICULE MOTORISÉ. CETTE ÉTIQUETTE NE PEUT ÊTRE UTILISÉE QU'À TITRE D'INFORMATION ET N'A PAS ÉTÉ AFFICHÉE ICI POUR DES RAISONS DE RESPONSABILITÉ LÉGALE.

**IMPORTANT NOTICE**

The wheel locks on this wheelchair have been pre-set at the factory to comply with the Veterans Administration functional Standard 8320.01 of the Federal Register, paragraph 3.2.4.5.3. If these wheel locks do not meet your needs, follow instructions below.

**CAUTION**

Any wheel lock adjustments should embed wheel lock shoe at least 1/8" into tire when locked (3/16" on pneumatic tires).

**INSTRUCTIONS FOR WHEEL LOCK ADJUSTMENTS**

1. Loosen wheel lock mounting fastener, which runs through mounting bracket and frame.
2. Slide clamp toward rear wheel until wheel lock shoe is embedded into tire material at least 1/8" when handle is engaged to the lock position (3/16" for pneumatic tires).
3. Tighten mounting fastener to secure mounting bracket in desired location and recheck lock shoe embedding.
4. Inspect for correct locking action BEFORE actual use.

00078X021-0394

**WEIGHT CAPACITY**  
**250 LBS. (114 kgs.)**  
 REFER TO OWNER'S MANUAL

<b>SEAT DEPTH</b>	16 and 18 inches	
<b>SEAT-TO-FLOOR (WITH 24-INCH WHEELS) ADULT:</b>	19 <sup>1</sup> / <sub>2</sub> inches	
<b>HEMI:</b>	N/A	17 <sup>1</sup> / <sub>2</sub> inches
<b>BACK HEIGHT</b>	23 inches (34 inches with headrest)	16 or 18 inches
<b>ARM STYLES</b>	Fixed or Adjustable Height Desk or Full Length Removable	Fixed or Adjustable Height Desk or Full Length Flip Back
<b>FRONT RIGGINGS</b>	Swingaways Footrests and Elevating Legrests	
<b>REAR AXLE</b>	Permanent	Permanent* and Quick Release
<b>REAR WHEELS</b>	20, 22 and 24*-inch Composite*, Urethane*, Pneumatic or Pneumatic-Flat Free Insert	
<b>HANDRIMS</b>	Composite*	
<b>WHEEL LOCKS</b>	High Mount, Push or Pull to Lock	
<b>CASTER SIZE</b>	8x1-1/4 inch Urethane*, 8x1-1/4 inch Pneumatic or Pneumatic-Flat Free Insert 8x1-3/4 inch Semi Pneumatic (standard on 20 and 22 inch width chairs)	6x1 inch Urethane, 8x1 inch Urethane, 8x1 inch Solid Rubber* and 8x1-1/4 inch Pneumatic (standard on 20 and 22 inch width chairs)
<b>UPHOLSTERY</b>	Vinyl	Black Nylon
<b>FRAME COLORS</b>	Chrome	Chrome
<b>WEIGHT LIMIT</b> SEAT WIDTH 14 TO 18 INCHES SEAT WIDTH 20 TO 22 INCHES	250 lbs (114 Kg) 300 lbs (136 Kg)	250 lbs (114 Kg) 300 lbs (136 Kg)
<b>WEIGHT**</b>	51 pounds	33-3/4 pounds
<b>SHIPPING WEIGHT*** (APPROX.)</b>	61 pounds	43 <sup>1</sup> / <sub>2</sub> pounds

\*NOTE: These options are standard for this model.

\*\*NOTE: The seat-to-floor heights are based on urethane tires. If the wheelchair is equipped with pneumatic (properly inflated) or solid rubber tires, add 1/4 inch to the measurements listed above. These heights can vary +/- 1/4-inch due to tire wear and manufacturing tolerances.

\*\*\*NOTE: Weights based on 18 x 16 inch wheelchair without front riggings. Weights will vary depending on how wheelchair is equipped.

# SECTION I—GENERAL GUIDELINES

## WARNING

**SECTION I - GENERAL GUIDELINES** contains important information for the safe operation and use of this product.

## Information for Healthcare Professionals/Assistants

The Tracer SX Recliner wheelchair **MUST** be operated by a healthcare professional or assistant when in ANY reclined position.

Make sure the patient is properly positioned in the wheelchair before reclining or inclining (reverse recline) to maintain maximum stability and safety.

Assistants **MUST** be prepared to support the weight of the occupant when reclining, or returning the occupant of the wheelchair to the full upright position. Make sure to use proper body mechanics (use your legs) or seek assistance if necessary to avoid injury.

**ALWAYS** engage both wheel locks while reclining or inclining (reverse recline) the wheelchair.

## Stability - All Models

The size/position of the front casters, size/position of the rear wheels, use of anti-tipper model, as well as the user condition directly relate to the stability of the wheelchair. Any change to one or any combination of the six may cause the wheelchair to decrease in stability. These adjustments **MUST** be performed by a qualified technician.

<i>NOTE: When changes to the left hand column occur, follow across the chart and refer to the procedure that is checked (✓) to maintain the proper stability, safety and handling of the wheelchair.</i>	CASTER SIZE	CASTER POSITION	WHEEL SIZE	WHEEL POSITION	ANTI-TIPPERS	USER CONDITION
<b>CASTER SIZE</b>	•	X	X	X	X	X
<b>CASTER POSITION</b>	X	•	X	X	X	X
<b>WHEEL SIZE</b>	X	X	•	X	X	X
<b>ANTI-TIPPERS</b>	X	X	X	•	X	X
<b>USER CONDITION</b>	X	X	X	X	X	•

The various seat-to-floor heights require specific settings depending on rear wheel size, rear wheel position, front caster size/position and desired seat-to-floor angle. These adjustments **MUST** be performed by a qualified technician.

## Anti-Tippers

Anti-tippers are specific to the different seat-to-floor angles and/or seat-to-floor heights. Refer to the charts in Installing/Adjusting Anti-Tippers on page 41 for correct usage and adjustment. If these requirements cannot be achieved, DO NOT use the wheelchair. Contact a qualified technician. If changing the seat-to-floor height with or without a change to seat-to-floor angle, the correct anti-tippers MUST be used to maintain a 1½ to 2-inch ground clearance.

Anti-tippers MUST be attached at all times. Inasmuch as the anti-tippers are an option on this wheelchair (you may order with or without the anti-tippers), Invacare strongly recommends ordering the anti-tippers as a safeguard for the wheelchair user.

ALWAYS use anti-tippers. When outdoors on wet, soft ground or on gravel surfaces, anti tippers may not provide the same level of protection against tipover. Extra caution must be observed when traversing such surfaces.

## Operating Information

After ANY adjustments, repair or service and BEFORE use, make sure all attaching hardware is tightened securely - otherwise injury or damage may result.

Unless otherwise noted, all service and adjustment should be performed while the wheelchair is unoccupied.

To determine and establish your particular safety limits, practice bending, reaching and transferring activities in several combinations in the presence of a qualified healthcare professional before attempting active use of the wheelchair.

When cleaning rear cane or hand grip areas use only a clean towel lightly dampened with cool water. Verify that grips are dry prior to use. Use of soap or ammonia based cleaning solutions will result in the hand grips sliding off the cane assembly. Failure to observe this warning may result in injury to the user or bystanders.

If the wheelchair is exposed to extreme temperature (above 100°F or below 32°F), high humidity and/or becomes wet, prior to use, ensure that the handgrips DO NOT twist on the handle. Otherwise, damage or injury may occur.

Avoid storing or using the wheelchair near open flame or combustible products. Serious injury or damage to property may result.

ALWAYS keep hands and fingers clear of moving parts to avoid injury.

DO NOT traverse, climb or go down ramps or slopes greater than 9°.

DO NOT attempt to move up or down an incline with a water, ice or oil film.

DO NOT operate on roads, streets or highways.

DO NOT attempt to ride over curbs or obstacles. Doing so may cause your wheelchair to tip over and cause bodily harm to you or damage to the wheelchair.

DO NOT attempt to reach objects if you have to move forward in the seat.

DO NOT attempt to reach objects if you have to pick them up from the floor by reaching down between your knees.

DO NOT lean over the top of the back upholstery to reach objects behind you, as this may cause the wheelchair to tip over.

DO NOT shift your weight or sitting position toward direction you are reaching as the wheelchair may tip over.

DO NOT attempt to stop a moving wheelchair with wheel locks. Wheel locks are not brakes.

DO NOT tip the wheelchair without assistance.

DO NOT use an escalator to move a wheelchair between floors. Serious bodily injury may occur.

Before attempting to transfer in or out of the wheelchair, every precaution should be taken to reduce the gap distance. Turn both casters parallel to the object you are transferring onto. When transferring to and from the wheelchair, ALWAYS engage both wheel locks.

DO NOT attempt to lift the wheelchair by any removable (detachable) parts. Lifting by means of any removable (detachable) parts of the wheelchair may result in injury to the user or damage to the wheelchair.

DO NOT stand on the frame of the wheelchair.

DO NOT use the footplate as a platform. When getting in or out of the wheelchair, make sure that the footplates are in the upward position.

ALWAYS wear your seat positioning strap. Inasmuch as the seat positioning strap is an option on this wheelchair (you may order with or without the seat positioning strap), Invacare strongly recommends ordering the seat positioning strap as an additional safeguard for the wheelchair user. The seat positioning strap is a positioning strap only. It is not designed for use as a safety device withstanding high stress loads such as auto or aircraft safety belts. If signs of wear appear, strap MUST be replaced IMMEDIATELY.

ALWAYS use the handrims for self-propulsion. Inasmuch as the handrims are an option on this wheelchair (you may order with or without the handrims), Invacare strongly recommends ordering the handrims as an additional safeguard for the wheelchair user.

## Weight Training

Invacare does not recommend the use of its wheelchairs as a weight training apparatus. Invacare wheelchairs have not been designed or tested as a seat for any kind of weight training. If occupant uses said wheelchair as a weight training apparatus, Invacare shall not be liable for bodily injury or damage to the wheelchair and the warranty is void.

## Weight Limitation

The Tracer SX5 and Tracer SX5 Recliner wheelchairs have the following weight limitations:

For chairs with a seat width of 14 to 18-inches, the weight limitation is 250 lbs (114 kg).

For chairs with a seat width of 20 to 22-inches, the weight limitation is 300 lbs (136 kg).

# SECTION 2—SAFETY/HANDLING OF WHEELCHAIRS

## Safety/Handling of Wheelchairs

Safety and handling of the wheelchair require the close attention of the wheelchair user as well as the assistant. This manual points out the most common procedures and techniques involved in the safe operation and maintenance of the wheelchair. It is important to practice and master these safe techniques until you are comfortable in maneuvering around the frequently encountered architectural barriers.

Use this information only as a basic guide. The techniques that are discussed on the following pages have been used successfully by many.

Individual wheelchair users often develop skills to deal with daily living activities that may differ from those described in this manual. Invacare recognizes and encourages each individual to try what works best for him/her in overcoming architectural obstacles that they may encounter. However, all warnings and cautions given in this manual **MUST** be heeded. Techniques in this manual are a starting point for the new wheelchair user and assistant with “safety” as the most important consideration for all.

## Stability and Balance

---

### **WARNING**

**ALWAYS wear your seat positioning strap. Inasmuch as the seat positioning strap is an option on this wheelchair (You may order with or without the seat positioning strap), Invacare strongly recommends ordering the seat positioning strap as an additional safeguard for the wheelchair user.**

---

ALWAYS wear your seat positioning strap. Inasmuch as the seat positioning strap is an option on this wheelchair (you may order with or without the seat positioning strap), Invacare strongly recommends ordering the seat positioning strap as an additional safeguard for the wheelchair user. The seat positioning strap is a positioning strap only. It is not designed for use as a safety device withstanding high stress loads such as auto or aircraft safety belts. If signs of wear appear, strap **MUST** be replaced **IMMEDIATELY**.

To assure stability and proper operation of your wheelchair, you **MUST** maintain proper balance at all times. Your wheelchair has been designed to remain upright and stable during normal daily activities as long as you **DO NOT** move beyond the center of gravity.

Virtually all activities which involve movement in the wheelchair have an effect on the center of gravity. Invacare recommends using seat/chest positioning straps for additional safety while involved in activities that shift your weight.

**DO NOT** lean forward out of the wheelchair any further than the length of the armrests. Make sure the casters are pointing in the forward position whenever you lean forward. This can be achieved by advancing the wheelchair and then reversing it in a straight line.

## Coping With Everyday Obstacles

Coping with the irritation of everyday obstacles can be alleviated somewhat by learning how to manage your wheelchair. Keep in mind your center of gravity to maintain stability and balance.

## A Note to Wheelchair Assistants

When assistance to the wheelchair user is required, remember to use good body mechanics. Keep your back straight and bend your knees whenever tipping the wheelchair or traversing curbs, or other impediments.

DO NOT attempt to lift the wheelchair by any removable (detachable) parts. Lifting by means of any removable (detachable) parts of the wheelchair may result in injury to the user or damage to the wheelchair.

If the wheelchair is exposed to extreme temperature (above 100°F or below 32°F), high humidity and/or becomes wet, prior to use, ensure handgrips DO NOT twist on the wheelchair's handle - otherwise damage or injury may occur.

Also, be aware of detachable parts such as armrests or legrests. These MUST NEVER be used to move the wheelchair or as lifting supports, as they may be inadvertently released, resulting in possible injury to the user and/or assistant(s).

When learning a new assistance technique, have an experienced assistant help you before attempting it alone.

---

### **WARNING**

**DO NOT attempt to reach objects if you have to move forward in the seat or pick them up from the floor by reaching down between your knees.**

**The seat depth, back height/angle, seat angle, size/position of the front casters, size/position of the rear wheels, anti-tipper model, as well as the user condition directly relate to the stability of the wheelchair. Any change to one or any combination of the ten may cause the wheelchair to decrease in stability. These adjustments MUST be performed by a qualified technician.**

---

Many activities require the wheelchair owner to reach, bend and transfer in and out of the wheelchair. These movements will cause a change to the normal balance, the center of gravity, and the weight distribution of the wheelchair. To determine and establish your particular safety limits, practice bending, reaching and transferring activities in several combinations in the presence of a qualified healthcare professional before attempting active use of the wheelchair.

Proper positioning is essential for your safety. When reaching, leaning, or bending forward, it is important to use the front casters as a tool to maintain stability and balance.

## Reaching, Leaning and Bending Forward

---

### **⚠ WARNING**

**DO NOT** attempt to reach objects if you have to move forward in the seat or pick them up from the floor by reaching down between your knees.

---

*NOTE: For this procedure, refer to FIGURE 2.1.*

Position the front casters so that they are extended as far forward as possible and engage wheel locks.

**FIGURE 2.1** Reaching, Leaning and Bending Forward

## Reaching and Leaning Backwards

---

### **⚠ WARNING**

**DO NOT** lean over the top of the back upholstery to reach objects behind you, as this may cause the wheelchair to tip over.

---

*NOTE: For this procedure, refer to FIGURE 2.2.*

Position wheelchair as close as possible to the desired object. Point front casters forward to create the longest possible wheelbase. Reach back only as far as your arm will extend without changing your sitting position.

**FIGURE 2.2** Reaching and Leaning Backwards

## Tipping

---

### **⚠ WARNING**

**DO NOT** tip the wheelchair without assistance.

---

When tipping the wheelchair, an assistant should grasp the back of the wheelchair on a non-removable (non-detachable) part. Inform the wheelchair occupant before tipping the wheelchair and remind him/her to lean back. Be sure the occupant's feet and hands are clear of all wheels and/or pinch points.

After mastering the techniques of tipping the wheelchair, use one of the following methods to tackle curbs, short stairs, etc.

## Method 1 - Wheelchair With Step Tubes

*NOTE: For this procedure, refer to FIGURE 2.3.*

Place foot on the step tube and begin to tilt the wheelchair toward you. Apply a continuous downward motion until the balance point is achieved and the front casters clear the curb. At this point, the assistant will feel a difference in the weight distribution.

---

### **⚠ WARNING**

**When lowering the front casters of the wheelchair, DO NOT let the wheelchair drop the last few inches to the ground. This could result in injury to the occupant and/or damage to the wheelchair.**

---

Roll the wheelchair forward and slowly lower the front of the wheelchair in one continuous movement onto the sidewalk. Push the wheelchair forward until the rear wheels roll up and over the curb.

**FIGURE 2.3** Method 1 - Wheelchair With Step Tubes

## Method 2 - Wheelchair Without Step Tubes

---

### **⚠ WARNING**

**ALWAYS check hand grips for looseness before using the wheelchair. If loose and/or worn, replace IMMEDIATELY.**

---

*NOTE: For this procedure, refer to FIGURE 2.4.*

This method requires two assistants. The second assistant should be positioned at the front of the wheelchair lifting upward on a non-removable (non-detachable) part of the wheelchair frame when lifting the wheelchair and stabilizing the wheelchair when the wheelchair is being lowered to the ground.

**FIGURE 2.4** Method 2 - Wheelchair Without Step Tubes

The first assistant should stand on the sidewalk and turn the wheelchair so that the rear wheels are against the curb. Turn the anti-tippers so the anti-tip wheels are pointing up. The wheelchair should be tilted back to the balance point and, in one continuous upward movement, the rear wheels should be pulled up and over the curb. DO NOT return the front casters to the ground until the wheelchair has been pulled backward far enough for the front casters to clear the edge of the curb.

---

**⚠ WARNING**

**When lowering the front casters of the wheelchair, DO NOT let the wheelchair drop the last few inches to the ground. This could result in injury to the occupant and/or damage to the wheelchair.**

---

Roll the wheelchair backward and slowly lower the wheelchair in one continuous movement. Turn the anti-tippers so the anti-tip wheels are facing down.

## Stairways

---

**⚠ WARNING**

**ALWAYS** wear your seat positioning strap. Inasmuch as the seat positioning strap is an option on this wheelchair (you may order with or without the seat positioning strap), Invacare strongly recommends ordering the seat positioning strap as an additional safeguard for the wheelchair user. The seat positioning strap is a positioning strap only. It is not designed for use as a safety device withstanding high stress loads such as auto or aircraft safety belts. If signs of wear appear, strap **MUST** be replaced **IMMEDIATELY**.

**DO NOT** attempt to lift a wheelchair by lifting on any removable (detachable) parts. Lifting by means of any removable (detachable) parts of the wheelchair may result in injury to the user or damage to the wheelchair.

**ALWAYS** check hand grips for looseness before using the wheelchair. If loose and/or worn, replace **IMMEDIATELY**.

Extreme caution is advised when it is necessary to move an occupied wheelchair up or down the stairs. Invacare recommends that, if possible, the user be removed from the wheelchair prior to moving. Invacare recommends using two assistants and making thorough preparations. Make sure to use only secure, non-detachable parts for hand-held supports.

---

*NOTE: For this procedure, refer to FIGURE 2.5.*

Follow this procedure for moving the wheelchair between floors when an elevator is not available:

1. If necessary, rotate the anti-tippers so the wheels are facing up.
2. After the wheelchair has been tilted back to the balance point, one assistant (in the rear) backs the wheelchair up against the first step, while securely grasping a non-removable (non-detachable) part of the wheelchair for leverage.
3. The second assistant, with a firm hold on a non-detachable part of the framework, lifts the wheelchair up and over the stair and steadies the wheelchair as the first assistant places one foot on the next stair and repeats STEP 1.
4. The wheelchair should not be lowered until the last stair has been negotiated and the wheelchair has been rolled away from the stairway.
5. If necessary, rotate the anti-tippers so the wheels are facing down.

**FIGURE 2.5** Stairways

## Escalators

---

### **⚠ WARNING**

**DO NOT** use an escalator to move a wheelchair between floors. Serious bodily injury may occur.

---

## Transferring To and From Other Seats

---

### **⚠ WARNING**

**Before attempting to transfer in or out of the wheelchair, every precaution should be taken to reduce the gap distance. Turn both casters parallel to the object you are transferring onto. Also be certain the wheel locks are engaged to help prevent the wheels from moving.**

---

### **CAUTION**

**When transferring, position yourself as far back as possible in the seat. This will help prevent damaged upholstery and the possibility of the wheelchair tipping forward.**

---

*NOTE: For this procedure, refer to FIGURE 2.6.*

*NOTE: This activity may be performed independently provided you have adequate mobility and upper body strength.*

Position the wheelchair as close as possible alongside the seat to which you are transferring, with the front casters pointing parallel to it. Remove or flip up the armrest. Engage wheel locks. Swing away or remove front rigging. Shift body weight into seat with transfer.

During independent transfer, little or no seat platform will be beneath you. Use a transfer board if at all possible.

**FIGURE 2.6** Transferring To and From Other Seats

## Unfolding and Folding Wheelchair

---

### **⚠ WARNING**

**ALWAYS** keep hands and fingers clear of moving parts to avoid injury.

**DO NOT** place hand or fingers on the underside of the seat frame rail when opening or closing the wheelchair.

**DO NOT** sit or transfer into the wheelchair unless it is fully open and the seat frame rails are fully seated into the side frame H-blocks.

**Invacare recommends that a non-folding device be installed to keep the wheelchair from being folded when left unoccupied in a public place.**

---

### Unfolding

*NOTE: For this procedure, refer to FIGURE 2.7 on page 21.*

1. Tilt the wheelchair toward you (raising the opposite wheel and caster off the ground/floor).
2. Place your hand on the top of the seat rail closest to you where the seat upholstery is attached.
3. Point your fingers and thumb to the inside of the wheelchair.
4. Press downward on the top of the seat rail until the wheelchair is fully open and the seat rails are fully seated in the H-blocks.
5. Tracer SX5 RECLINERS ONLY - Install spreader bar. Refer to Removing/Installing the spreader bar in section 10 of this manual.
6. Engage both wheel locks, open the footrest/legrest for clearance and transfer into the wheelchair. Refer to Transferring To and From Other Seats on page 19.

*NOTE: DO NOT wrap thumb or fingers under the seat rail. Point fingers and thumb to the inside of the wheelchair.*

*NOTE: Press down on the seat rail and the seat upholstery with the entire hand. DO NOT place any part of the hand under the seat rail.*

**FIGURE 2.7** Unfolding

## Folding Wheelchair

*NOTE: For this procedure, refer to FIGURE 2.8 on page 22.*

1. Tracer SX5 RECLINERS ONLY - Perform the following steps:
  - A. Push in detent pin on one side of spreader bar.
  - B. While holding the spreader bar, pull out handle until the release pin is out of the handle of the back cane.
  - C. Drop the spreader bar to one side.
2. Swing footrest/legrest in locked position to the front of the wheelchair.
3. Pivot footplates upward to vertical position.
4. With both hands, grasp the middle of the seat upholstery at the front and back edge and lift up.

## CAUTION

**DO NOT allow upholstery to hang between the cross braces.**

5. Place excess seat upholstery over the armrest.

**FIGURE 2.8** Folding Wheelchair

### **Folding Hammock or Sling Seat Models.**

*NOTE: For this procedure, refer to FIGURE 2.9.*

1. Swing footrest/legrest and calfpads in locked position to the front of the wheelchair.
2. Pivot footplates upward to vertical position.
3. With both hands, grasp the middle of the seat upholstery at the front and back edge and lift up.
4. Continue to close the wheelchair by grasping the armrest furthest from you and pulling the armrest towards you.

**FIGURE 2.9** Folding Hammock or Sling Seat Models.

# SECTION 3—SAFETY

## INSPECTION/TROUBLESHOOTING

*NOTE: Every six months or as necessary, take your wheelchair to a qualified technician for a thorough inspection and servicing. Regular cleaning will reveal loose or worn parts and enhance the smooth operation of your wheelchair. To operate properly and safely, your wheelchair MUST be cared for just like any other vehicle. Routine maintenance will extend the life and efficiency of your wheelchair.*

### Safety Inspection Checklist

Initial adjustments should be made to suit your personal body structure and preference. Thereafter follow these maintenance procedures:

#### Inspect/Adjust Initially

- ☐ Ensure that the wheelchair rolls straight (no excessive drag or pull to one side).
- ☐ Inspect for loose or missing hardware on frame and crossbraces.
- ☐ Inspect for bent frame or crossbraces.
- ☐ Check that the wheel locks DO NOT interfere with tires when rolling.
- ☐ Check that the wheel lock pivot points are free of wear and looseness.
- ☐ Check that the wheel locks are easy to engage.
- ☐ Ensure that the wheel locks prevent the wheelchair from moving when engaged.
- ☐ Inspect the seat and back for rips and sagging.
- ☐ Inspect the seat and back for loose or broken hardware.
- ☐ Inspect the back cane hand grips for wear/looseness/deterioration.
- ☐ Inspect seat positioning strap for any signs of wear. Ensure buckle latches. Verify hardware that attaches strap to frame is secure and undamaged. Replace if necessary.
- ☐ Inspect tires for flat spots and wear.
- ☐ Check pneumatic tires for proper inflation.

---

### CAUTION

**As with any vehicle, check the wheels and tires periodically for cracks and wear. Replace if damaged.**

---

- ☐ Check that there is no excessive side movement or binding in the rear wheels when lifted and spun.
- ☐ Inspect rear wheels for cracked, bent or broken spokes.
- ☐ Ensure all spokes are uniformly tight.
- ☐ Inspect handrims for signs of rough edges or peeling.

- ☐ Inspect axle assembly for proper tension by spinning caster. Caster should come to a gradual stop.
- ☐ Adjust front casters/forks bearing system if wheel wobbles noticeably or binds to a stop.
- ☐ Ensure wheel bearings are clean and free of moisture.
- ☐ Check headtube locknuts for tightness.
- ☐ Inspect casters for cracks and wear.
- ☐ Inspect front casters for cracked, bent or broken spokes.
- ☐ Clean upholstery and armrests.
- ☐ Check that all labels are present and legible. Replace if necessary.

### **Inspect/Adjust Weekly**

- ☐ Ensure that the wheel locks prevent the wheelchair from moving when engaged.
- ☐ Inspect tires for flat spots and wear.
- ☐ Check pneumatic tires for proper inflation.
- ☐ Inspect rear wheels for cracked, bent or broken spokes.
- ☐ Ensure all spokes are uniformly tight.
- ☐ Inspect axle assembly for proper tension by spinning caster. Caster should come to a gradual stop.
- ☐ Inspect front caster for cracked, bent or broken spokes.

### **Inspect/Adjust Monthly**

- ☐ Ensure that the wheelchair rolls straight (no excessive drag or pull to one side).
- ☐ Check that the wheel locks DO NOT interfere with tires when rolling.
- ☐ Check that the wheel lock pivot points are free of wear and looseness.
- ☐ Inspect seat and back for loose or broken hardware.
- ☐ Inspect seat positioning strap for any signs of wear. Ensure buckle latches. Verify hardware that attaches strap to frame is secure and undamaged. Replace if necessary.
- ☐ Inspect back cane hand grips for wear/looseness/deterioration.
- ☐ Adjust front casters/forks bearing system if wheel wobbles noticeably or binds to a stop.
- ☐ Ensure wheel bearings are clean and free of moisture.
- ☐ Check headtube locknuts for tightness.

**Inspect/Adjust Periodically**

- ☐ Inspect frame and crossbraces for loose or missing hardware.
- ☐ Inspect for bent frame or crossbraces.
- ☐ Check that wheel locks are easy to engage.
- ☐ Inspect seat and backs for rips and sagging.
- ☐ Check that there is no excessive side movement or binding in the rear wheels when lifted and spun.
- ☐ Inspect handrims for signs of rough edges or peeling.
- ☐ Adjust front casters/forks bearing system if wheel wobbles noticeably or binds to a stop.
- ☐ Ensure wheel bearings are clean and free of moisture.
- ☐ Inspect casters for cracks and wear.
- ☐ Clean upholstery and armrests.
- ☐ Check that all labels are present and legible. Replace if necessary.

**Troubleshooting**

Chair Veers Right/Left	Chair 3 Wheels	Sluggish Turn or Performance	Casters Flutter	Squeaks and Rattles	Looseness in Chair	Solutions
X	X	X	X			Check tires for correct and equal pressure
		X	X	X	X	Check for loose nuts and bolts.
X	X		X			Check caster headtube angle.
X	X					Check that rear wheels are equally spaced away from seat frame.

## Maintenance

### Maintenance Safety Precautions

---

#### **⚠ WARNING**

**After any adjustments, repair or service and before use, make sure all attaching hardware is tightened securely. Otherwise injury or damage may result.**

---

#### **CAUTION**

**DO NOT** overtighten hardware attaching to the frame. This could cause damage to the frame tubing.

---

### Suggested Maintenance Procedures

1. Before using your wheelchair, make sure all nuts and bolts are tight. Check all parts for damage or wear and replace. Check all parts for proper adjustment.
- 

#### **CAUTION**

**As with any vehicle, the rear wheels, casters and tires should be checked periodically for cracks and wear, and should be replaced if damaged.**

---

2. The rear wheels, casters and tires should be checked periodically for cracks and wear, and should be replaced by a qualified technician if damaged.

*NOTE: Tire wear is excessive if:*

- *Pneumatic Tires - there is missing tread or the tires are bald.*
- *Urethane Tires - there are cuts, surface defects or the tires are loose on the rims.*
- *Rubber Tires - 30% or more of the tire has worn away.*

*NOTE: Invacare recommends that tires and casters be replaced every five years.*

3. Periodically adjust wheel locks in correlation to tire wear. Refer to Adjusting Patient Operated Wheel Locks on page 44.
  4. Periodically check handrims to ensure they are secured to the rear wheels. If loose, have them tightened by a qualified technician.
  5. Periodically check caster wheel bearings to make sure they are clean and free from moisture. Use a Teflon™ lubricant if necessary.
- 

#### **⚠ WARNING**

**When cleaning rear cane or hand grip areas use only a clean towel lightly dampened with cool water. Verify that grips are dry prior to use. Use of soap or ammonia based cleaning solutions will result in the hand grips sliding off the cane assembly. Failure to observe this warning may result in injury to the user or bystanders.**

---

6. Hand grips should be checked monthly for wear/looseness/deterioration. Clean if desired. Replace if looseness or deterioration is found.
  7. Check upholstery for sagging, rips or tears.
-

## SECTION 4—FRONT RIGGINGS

### **⚠ WARNING**

After any adjustments, repair or service and before use, make sure all attaching hardware is tightened securely. Otherwise injury or damage may occur.

## Installing/Removing Front Riggings

*NOTE: For this procedure, refer to FIGURE 4.1.*

### Installing

1. Turn the front rigging assembly to the side (open front rigging is perpendicular to wheelchair).
2. Install the hinge plates on the front rigging assembly onto the hinge pins on the wheelchair frame.
3. Push the front rigging assembly towards the inside of the wheelchair until it locks into place.

*NOTE: The footplate will be on the inside of the wheelchair when locked in place.*

4. Repeat this procedure for the other front rigging assembly.
5. To release the front rigging, push the front rigging release lever inward, rotate front rigging outward.

*NOTE: Swingaway footrest shown.*

**FIGURE 4.1** Installing/Removing Front Riggings

### Removing

1. Push the front rigging release lever inward
2. Rotate swingaway front rigging assembly outward.
3. Lift the swingaway front rigging assembly off the hinge pins.

## Adjusting Footplate Height

*NOTE: For this procedure, refer to FIGURE 4.2.*

*NOTE: This procedure applies to the swingaway front riggings and swingaway elevating legrest.*

1. Remove the front rigging assembly. Refer to Installing/Removing Front Riggings on page 27.

*NOTE: Lay the front rigging assembly on a flat surface to simplify this procedure.*

2. Pull the cam lock lever up to unlocked position.

*NOTE: The elevating legrest has two sets of release buttons, one set above the other. Each set will be visible one at a time allowing finer footplate height adjustment.*

3. Push in the release buttons and reposition the footplate assembly to the desired height.
4. Ensure that the release buttons fully protrude from holes on both sides of the front rigging support.
5. Rotate cam lock lever down to locked position.
6. Repeat this procedure for the other footplate, if necessary.
7. Reinstall the swingaway front rigging assembly. Refer to Installing/Removing Front Riggings on page 27.

*NOTE: Swingaway footrest shown.*

**FIGURE 4.2** Adjusting Footplate Height

## Raising/Lowering Elevating Legrest Assembly

---

### **⚠ WARNING**

**Ensure hands and fingers are clear of elevating legrest mechanism before pushing release lever to lower the elevating legrest. Otherwise injury may occur due to pinch points.**

**The wheelchair user's leg MUST be supported by an assistant before attempting to lower legrest.**

---

*NOTE: For this procedure, refer to FIGURE 4.3 on page 29.*

1. To raise the elevating legrest, the assistant should hold the support tube and raise the elevating legrest until the desired height is obtained.

2. To lower the elevating legrest, perform the following:
  - A. Support user leg with one hand.
  - B. Push release lever downward with other hand.
  - C. Gently, lower user leg down and rest against the legrest.

**FIGURE 4.3** Raising/Lowering Elevating Legrest Assembly

## Replacing Heel Loop

*NOTE: For this procedure, refer to FIGURE 4.4 on page 29.*

1. Pull the cam lock lever up to unlocked position.
2. Push in the release buttons and remove the footplate assembly from the front rigging support.
3. Remove the mounting screw, spacer and locknut that secure the heel loop to the footplate.
4. Remove existing heel loop from slide tube.
5. Install new heel loop onto slide tube.
6. Install the mounting screw, spacer and locknut to secure the heel loop to the footplate. Tighten until the spacer is secure.
7. Insert the lower footrest assembly into the upper footrest assembly to desired height.
8. Ensure that the release buttons fully protrude from holes on both sides of the upper footrest support.
9. Rotate cam lock lever down to locked position.

### Footplates with Spring Buttons

*NOTE: Swingaway footrest shown.*

### DETAIL "A"

**FIGURE 4.4** Replacing Heel Loop

## SECTION 5—ARMS

---

### **WARNING**

**After any adjustments, repair or service and before use, make sure all attaching hardware is tightened securely. Otherwise injury or damage may occur.**

---

## Using or Replacing Flip-Back Armrest

*NOTE: For this procedure, refer to FIGURE 5.1 on page 31.*

---

### **WARNING**

**DO NOT** operate or replace flip-back armrest when wheelchair is folded - otherwise injury or damage may result.

**Ensure armrest is securely locked into arm socket and armrest release button locks into place BEFORE using.**

---

### Using

1. Push down on front of armrest to ensure it is fully seated in front socket.

*NOTE: This step is needed to prevent the release button from hanging up on the socket.*

2. Press in armrest release button located on armrest front tube.
3. Rotate front of armrest up and out of arm socket.

*NOTE: Armrest can rotate back approximately 90°.*

4. To prepare armrest for use, rotate armrest downward, making sure front tube of armrest inserts into arm socket.
5. Push armrest down until release button snaps into arm socket.
6. Ensure armrest is securely locked into arm socket and armrest release button locks into place BEFORE using.

### Replacing

1. Perform STEPS 1-2 above to flip the armrest back.
2. Remove hex screw, spacer and locknut securing the EXISTING armrest and insert to the wheelchair frame.
3. Remove the EXISTING armrest from frame.
4. Inspect rear tube of new armrest to ensure insert is properly installed with mounting holes aligned.
5. If not properly aligned, rotate the insert using a flat screwdriver to align the mounting holes.

**FIGURE 5.1** Using or Replacing Flip-Back Armrest

## Adjusting Armrest Height

### **⚠ WARNING**

**Make sure the height adjustment lever is in the locked position before using the wheelchair.**

*NOTE: For this procedure, refer to FIGURE 5.2.*

1. Unlock the armrest by flipping the height adjustment lever on the top front of the armrest to the up (horizontal) position.
2. Adjust armrest to one of five positions.

*NOTE: Height adjustment lever MUST be in the unlocked position when placing armrest into the arm assembly.*

3. Lock the armrest by pressing the height adjustment lever into the down (vertical) position when the desired armrest height is achieved.
4. Repeat STEPS 1-3 for other armrest.

**FIGURE 5.2** Adjusting Armrest Height

## SECTION 6—SEAT AND BACK

### **⚠ WARNING**

**After any adjustments, repair or service and before use, make sure all attaching hardware is tightened securely. Otherwise injury or damage may occur.**

*NOTE: The procedures in this section apply to non-recliner models only. For recliner models, refer to Recliner on page 48.*

### **⚠ WARNING**

**After ANY adjustments, repair or service and BEFORE use, make sure all attaching hardware is tightened securely - otherwise injury or damage may occur.**

## Installing the Back Canes

*NOTE: For this procedure, refer to FIGURE 6.1.*

1. Remove the hex screw and locknut from the bottom of one back cane.
2. Position threaded insert into the bottom of each back cane with nut facing the outside of the wheelchair and aligned with the mounting hole in the bottom of the back cane.
3. Insert the back cane into the a mounting hole in the wheelchair frame.
4. Position the hex screw through the wheelchair frame, back cane, and threaded insert as shown in FIGURE 6.1.

*NOTE: The hex screw should be inserted from the inside of the wheelchair frame.*

5. Torque the hex screw to 60-80 inch pounds.
6. Install the locknut onto the hex screw. Secure the hex screw to prevent it from backing out and torque the locknut to 60-80 inch pounds.

**FIGURE 6.1** Installing the Back Canes

## Replacing Back Upholstery

*NOTE: For this procedure, refer to FIGURE 6.2.*

1. Remove the eight mounting screws and washers that secure the existing back upholstery to the back canes.
2. Remove existing back upholstery from the back canes.
3. Securely tighten the new back upholstery to the back canes with the phillips screws and washers. The following chart determines the number of mounting screws for each seat depth.

**FIGURE 6.2** Replacing Back Upholstery

## Replacing Seat Upholstery

*NOTE: For this procedure, refer to FIGURE 6.3.*

1. Remove the eight phillips screws and washers that secure the existing seat upholstery to the crossbraces.
2. Remove the existing seat upholstery from the crossbraces.
3. Ensure positioning of seat positioning strap (if used). Refer to [Installing the Seat Positioning Strap](#) on page 58.
4. Install new seat upholstery by reversing STEPS 1-2.

**FIGURE 6.3** Replacing Seat Upholstery

## Adjusting Seat Depth

### **⚠ WARNING**

The seat depth, size/position of the front casters, size/position of the rear wheels, use of an anti-tipper model, as well as the user condition directly relate to the stability of the wheelchair. Any change to one or any combination of the seven may cause the wheelchair to decrease in stability. These adjustments **MUST** be performed by a qualified technician.

*NOTE: For this procedure, refer to FIGURE 6.4 on page 34.*

1. Remove the existing seat upholstery from the wheelchair. Refer to [Replacing Seat Upholstery](#) on page 33.

*NOTE: If adjusting the seat depth of the wheelchair, the seat upholstery MUST be changed as well.*

2. Remove the two plug buttons from the ends of the crossbraces that are towards the front of the wheelchair.

*NOTE: The two plug buttons will be used in the ends of the seat extensions.*

3. Install the two seat extension tubes into the ends on the crossbraces. Line up the rear mounting hole of the seat extension tube with the second mounting hole from the end of the crossbrace.
4. Install the two seat extension spacers onto the two seat extension tubes.
5. Install the new seat upholstery onto the wheelchair. Make sure to line up the mounting holes in the seat extension tubes and seat extension spacers with the new seat upholstery. Refer to Replacing Seat Upholstery on page 33.
6. Install plug buttons into the ends of the seat extension spacers.

**FIGURE 6.4** Adjusting Seat Depth

## Adjusting the Seat Width

*NOTE: For this procedure, refer to FIGURE 6.5 on page 35 and FIGURE 6.6 on page 36.*

*NOTE: When adjusting the seat width of the wheelchair, the back and seat upholstery MUST be changed. If applicable, the headrest pillow and headrest upholstery MUST be changed as well.*

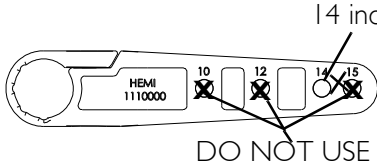

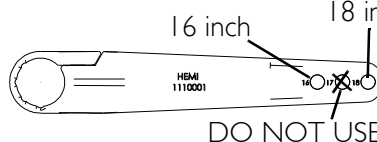

1. Remove the existing back and seat upholstery from the wheelchair. Refer to Replacing Back Upholstery on page 33 and Replacing Seat Upholstery on page 33.
2. Remove the four button screws and locknuts that secure the two pivot links to the wheelchair frame and crossbraces.
3. Remove the two button screws, locknuts and crossbrace saddle that secures the bottom of the crossbrace to the wheelchair frame. Repeat for other crossbrace.
4. Remove the hex screw, coved washers, washers and locknut that secure the two crossbraces together. See Detail "B".

*NOTE: Note the orientation of the coved washers, washers and locknut for assembling the NEW crossbraces. See Detail "B".*

5. Assemble the two new crossbraces together with the existing hex screw, coved washers, washers and locknut. Securely tighten. Refer to Detail "B" for hardware orientation.
6. Determine the correct pivot link and mounting hole to use with the desired seat width. See chart below.
7. Secure the pivot links to the crossbraces and wheelchair frame with the four button screws and locknuts. Securely tighten.

*NOTE: Position crossbrace saddle on wheelchair frame using the washer on the underside of the wheelchair frame as a reference. See Detail "A" for proper positioning of the crossbrace saddle.*

8. Reinstall the two button screws, locknuts and crossbrace saddle that secures the bottom of the new crossbrace to the wheelchair frame. Refer to Detail "B" for hardware orientation. Repeat for opposite crossbrace. Securely tighten.
9. Install the new back and seat upholstery onto the wheelchair. Refer to [Replacing Back Upholstery](#) on page 33 and [Replacing Seat Upholstery](#) on page 33.

SEAT WIDTH	PIVOT LINK
<b>14 - INCH 18 - INCH</b>	 <p>DO NOT USE</p>
<b>16 - INCH 18 - INCH</b>	 <p>DO NOT USE</p>
<b>20- INCH 22 - INCH</b>	

**FIGURE 6.5** Adjusting the Seat Width

**FIGURE 6.6** Adjusting the Seat Width

---

## SECTION 7—REAR WHEELS

---

### **WARNING**

**After any adjustments, repair or service and before use, make sure all attaching hardware is tightened securely. Otherwise injury or damage may occur.**

---

*NOTE: The procedures in this section apply to non-recliner models only. For recliner models, refer to Recliner on page 48.*

## Removing/Installing Rear Wheels

---

### **WARNING**

**Only a qualified technician may change the size of the rear wheel or the seat-to-floor height.**

**If changing the size of the rear wheel or a change in the seat-to-floor height is desired, this procedure **MUST** be performed by a qualified technician.**

**Make sure both rear wheels are the same size and are installed into the same respective mounting hole before using the wheelchair, otherwise injury may occur.**

---

## Permanent Axles

---

### **WARNING**

**This procedure **MUST** be performed by a qualified technician.**

---

*NOTE: For this procedure, refer to FIGURE 7.1 on page 38.*

*NOTE: If replacing the same size rear wheel, note the mounting position on the wheelchair frame for proper reinstallation of the new rear wheel.*

1. Remove the dust cap (SA Frame only), hex screw, washer (SA Frame only), spacer (if installed) and locknut that secure the rear wheel to the wheelchair frame.

*NOTE: The spacer is used on wheelchairs with removable arms only.*

2. Repeat STEP 1 for the opposite rear wheel if desired.
3. To reinstall the rear wheel(s) onto the wheelchair, reverse STEPS 1-2 and torque locknut to 40 ft.-lbs.
4. Adjust wheel locks. Refer to Using/Adjusting Patient Operated Wheel Locks on page 43.

**FIGURE 7.1** Removing/Installing Rear Wheels - Permanent Axles

## Replacing Rear Wheel Handrim

---

### **⚠ WARNING**

**If the wheelchair is equipped with permanent axles, this procedure **MUST** be performed by a qualified technician.**

---

*NOTE: For this procedure, refer to FIGURE 7.2.*

1. Remove the rear wheel from the wheelchair. For non-recliner models, refer to Removing/Installing Rear Wheels on page 37. For recliner models, refer to Removing/Installing the Rear Wheels on page 53.
2. Remove the mounting screws that secure the handrim to the rear wheel.
3. Remove the existing handrim.
4. Install the new handrim by reversing the preceding steps.
5. Reinstall rear wheel to the wheelchair. Refer to Removing/Installing Rear Wheels on page 37.
6. Repeat STEPS 1-5 for the opposite rear wheel if necessary.

**FIGURE 7.2** Replacing Rear Wheel Handrim

## Replacing/Repairing Rear Wheel Tire

---

### **⚠ WARNING**

**Replacement of rear wheel tire **MUST** be performed by a qualified technician.**

---

### **CAUTION**

**As with any vehicle, the wheels and tires should be checked periodically for cracks and wear, and should be replaced if damaged.**

---

## SECTION 8—FRONT CASTERS

### **⚠ WARNING**

After any adjustments, repair or service and before use, make sure all attaching hardware is tightened securely. Otherwise injury or damage may occur.

## Installing/Replacing Six or Eight-Inch Front Casters and Forks

### **⚠ WARNING**

Make sure both fork/caster assemblies are the same size **BEFORE** using the wheelchair, otherwise injury may occur.

*NOTE: For this procedure, refer to For this procedure, refer to FIGURE 8.1.*

*NOTE: This procedure can be performed if replacing the exact same size front caster.*

1. Remove the dust cover.
2. Remove the locknut and nylon washer that secures the fork to the caster headtube.
3. Drop the fork assembly out of the caster headtube.

*NOTE: If caster replacement is desired, refer to Replacing/Repairing Front Caster Tire/Tube on page 40.*

4. Slide the new fork assembly into the caster headtube.
5. Reassemble by reversing STEPS 1-3.
6. Repeat STEPS 1-6 for the opposite fork assembly.
7. Adjust the forks. Refer to Adjusting Forks on page 40.

### **DETAIL "A" - NON-RECLINER WHEELCHAIRS UNDER 20 INCHES WIDE**

### **DETAIL "B" - NON-RECLINER WHEELCHAIRS UNDER 20 TO 22 INCHES WIDE AND RECLINER MODELS**

**FIGURE 8.1** Installing/Replacing Six or Eight-Inch Front Casters and Forks

## Adjusting Forks

1. To properly tighten caster journal system and guard against flutter, perform the following check:
  - A. Tip back of wheelchair to floor.
  - B. Pivot both forks and casters to top of their arc simultaneously.
  - C. Let casters drop to bottom of arc (wheels should swing once to one-side, then IMMEDIATELY rest in a straight downward position).
  - D. Adjust locknuts according to freedom of caster swing.
  - E. Repeat STEPS C-D until wheels swing once to one-side, then IMMEDIATELY rest in a downward position.
2. Test wheelchair for maneuverability.
3. Readjust locknuts if necessary, and repeat STEPS 1-2 until correct.
4. Snap dust cover over the locknut and stem.

## Replacing Front Casters

*NOTE: For this procedure, refer to FIGURE 8.2.*

---

### **⚠ WARNING**

**Make sure both front casters are the same size and are installed into the same respective mounting hole before using the wheelchair, otherwise injury may occur.**

---

*NOTE: If replacing the same size front caster, note the mounting position on the fork assembly for proper reinstallation of the new front caster.*

1. Remove the hex screw, washers and locknut that secure the front caster to the fork.

*NOTE: Washers are only used with 8-inch casters with precision bearings.*

2. To reinstall the new front caster onto the fork, reverse step 1.

**FIGURE 8.2** Replacing Front Casters

## Replacing/Repairing Front Caster Tire/Tube

---

### **⚠ WARNING**

**Replacement of front caster tire or tube MUST be performed by a qualified technician.**

---

### **CAUTION**

**As with any vehicle, the wheels and tires should be checked periodically for cracks and wear, and should be replaced when necessary.**

---

# SECTION 9—ANTI-TIPPERS/WHEEL LOCKS

## **⚠ WARNING**

After any adjustments, repair or service and before use, make sure all attaching hardware is tightened securely. Otherwise injury or damage may occur.

## Installing/Adjusting Anti-Tippers

*NOTE: For this procedure, refer to FIGURE 9.1 and FIGURE 9.2 on page 42.*

## **⚠ WARNING**

Anti-tippers are specific to the different seat-to-floor angles and/or seat-to-floor heights. Refer to the chart in this section of the manual for correct usage and adjustment. If these requirements cannot be achieved, **DO NOT** use the wheelchair. Contact a qualified technician. If changing the seat-to-floor height with or without a change to seat-to-floor angle, the correct anti-tippers **MUST** be used to maintain a 1-1/2 to 2-inch ground clearance.

If so equipped, anti-tippers **MUST** be attached at all times. Inasmuch as the anti-tippers are an option for 0° or 3° on this wheelchair (You may order with or without the anti-tippers), Invacare strongly recommends ordering the anti-tippers as a safeguard for the wheelchair user.

Anti-tippers **MUST** be fully engaged and release buttons fully protruding out of adjustment holes.

**ALWAYS** use anti-tippers. When outdoors on wet, soft ground or on gravel surfaces, anti tippers may not provide the same level of protection against tipover. Extra caution must be observed when traversing such surfaces.

Ensure both anti-tippers are adjusted to the same mounting hole.

## Installing Anti-Tippers

*NOTE: To ensure the correct model anti-tipper is used refer to FIGURE 9.1. Measurements for anti-tippers are approximate and are taken with extension tube in bottom hole position.*

WHEELCHAIR MODEL	SEAT-TO-FLOOR HEIGHT IN INCHES	ANTI-TIPPER (MEASUREMENTS IN INCHES)			
		LENGTH	HEIGHT	MODEL	PART NO.
TRACER SX5	17 1/2 to 19 1/2	13 1/2	3 1/2	I360	I058836
TRACER SX5	15 1/2 to 17 1/2	11 5/8	2 3/4	I360A	I058752
TRACER SX5 RECLINER	17 1/2 to 19 1/2	13 1/2	3 1/2	N/A	I088242

**FIGURE 9.1** Installing/Adjusting Anti-Tippers - Anti-Tipper Length

1. Press the release buttons and insert the anti-tippers with the anti-tipper wheels pointing toward the ground/floor into the wheelchair frame tubing as shown in FIGURE 9.2.
2. Ensure that the release button of the anti-tipper fully protrudes out of the hole in the bottom of the wheelchair frame tubing.
3. Place the wheelchair on a flat surface.
4. Measure the distance between the bottom of the anti-tipper wheels and the ground/floor.

*NOTE: A 1½ to 2 inch clearance between the bottom of the anti-tipper wheels and the ground/floor MUST be maintained at all times.*

5. If the distance between the bottom of anti-tipper wheels and the ground/floor is not 1½ to 2 inches, adjust anti-tippers. Refer to Adjusting the Anti-Tippers on page 42.

**FIGURE 9.2** Installing Anti-Tippers

## Adjusting the Anti-Tippers

*NOTE: For this procedure, refer to FIGURE 9.3 on page 43.*

*NOTE: A 1½ to 2 inch clearance between the bottom of the anti-tipper wheels and the ground/floor MUST be maintained at all times.*

1. Place the wheelchair on a flat surface.

*NOTE: If adjusting anti-tippers on recliner models, ensure back canes are in the upright position BEFORE making adjustments.*

2. Press the release buttons on the wheeled portion of the anti-tipper and slide it up or down to the desired adjustment hole.
3. Check to make sure that the release buttons are fully engaged in adjustment holes.
4. Ensure both anti-tippers are adjusted to the same height.
5. Measure the distance between the bottom of the anti-tipper wheels and the ground/floor.

6. If the distance between the bottom of anti-tipper wheels and the ground/floor is not  $1\frac{1}{2}$  to 2 inches, repeat STEPS 2-5 until the distance is  $1\frac{1}{2}$  to 2 inches.
7. If the  $1\frac{1}{2}$  to 2 inch distance cannot be achieved with the anti-tippers, a different model may be required. Contact an Invacare dealer or qualified technician.

## Using/Adjusting Patient Operated Wheel Locks

### Using Patient Operated Wheel Locks

#### **⚠ WARNING**

**DO NOT attempt to stop a moving wheelchair with wheel locks. Wheel locks are not brakes.**

*NOTE: For this procedure, refer to FIGURE 9.4.*

*NOTE: Position wheelchair on a flat, level surface to perform this procedure.*

1. Ensure the wheelchair is not moving before engaging the wheel locks.
2. See Detail "A" for instructions on Push-to-Lock. Refer to Detail "B" for instructions on Pull-to-Lock.

**FIGURE 9.4** Using Patient Operated Wheel Locks

## Adjusting Patient Operated Wheel Locks

### **⚠ WARNING**

**DO NOT attempt to stop a moving wheelchair with the wheel locks. Wheel locks are not brakes.**

*NOTE: For this procedure, refer to FIGURE 9.5.*

*NOTE: If wheels are pneumatic, before adjusting the wheel lock assemblies, ensure that the tires are inflated to the recommended psi on the side wall of tire.*

1. Ensure the wheel lock is in the open (unlocked) position.
2. Loosen the bolt and locknut that secure the wheel lock assembly to the wheelchair frame.
3. Reposition the wheel lock so that when engaged, the wheel lock shoe embeds the tire  $\frac{1}{8}$  inch ( $\frac{3}{16}$  inch for pneumatic tires) and holds the wheelchair.
4. Securely tighten the bolt and locknut securing the wheel lock to the wheelchair frame.
5. Engage the wheel lock.
6. Measure the distance the wheel lock is embedded into the tire as shown in Detail "A".

*NOTE: Any wheel lock adjustment should embed the wheel lock shoe at least  $\frac{1}{8}$  inch ( $\frac{3}{16}$  inch for pneumatic tires) into the tire when engaged.*

7. Repeat the STEPS 1-6 until the wheel lock shoe embeds the tire  $\frac{1}{8}$  inch ( $\frac{3}{16}$  inch for pneumatic tires) and holds the wheelchair.
8. Repeat STEPS 1-7 for the opposite wheel lock.
9. Engage both wheel locks and ensure the occupied wheelchair is held in place when pushed.

### **⚠ WARNING**

**If wheel locks do not hold the occupied wheelchair in place, contact a qualified technician; otherwise injury or damage may occur.**

**FIGURE 9.5** Using Patient Operated Wheel Locks

# SECTION 10—SEAT TO FLOOR

## **⚠ WARNING**

After any adjustments, repair or service and before use, make sure all attaching hardware is tightened securely. Otherwise injury or damage may occur.

## Changing Seat-to-Floor Height

*NOTE: For this procedure, refer to FIGURE 10.1 on page 46 and FIGURE 10.2 on page 47.*

## **⚠ WARNING**

The seat depth, size/position of the front casters, size/position of the rear wheels, use of an anti-tipper model, as well as the user condition directly relate to the stability of the wheelchair. Any change to one or any combination of the seven may cause the wheelchair to decrease in stability. These adjustments **MUST** be performed by a qualified technician.

Seat-to-floor heights have specific positions depending on rear wheel size, rear wheel position, front caster size and front caster position. These adjustments **MUST** be performed by a qualified technician.

If changing the seat-to-floor height the correct anti-tippers **MUST** be ordered to maintain a 1 1/2 to 2 inch ground clearance.

1. Refer to one of the following charts to determine mounting positions for front casters/forks and rear wheels for the desired obtainable seat-to-floor height:
  - A. Adult/Hemi Frame Style - FIGURE 10.1.
  - B. Recliner Frame Style - FIGURE 10.2.
2. Remove the rear wheels from the wheelchair. Refer to one of the following procedures:
  - A. Adult/Hemi Frame Style - Refer to Removing/Installing Rear Wheels on page 37.
  - B. Recliner Frame Style - Refer to Removing/Installing the Rear Wheels on page 53.
3. If necessary, replace the front casters and forks with the casters and forks indicated in the chart. Refer to replacing front casters and installing/replacing fork assemblies in section 7 of this manual.
4. Reinstall the rear wheels onto the wheelchair in the mounting position indicated in the chart. Refer to one of the following procedures.
  - A. Adult/Hemi Frame Style - Refer to Removing/Installing Rear Wheels on page 37.
  - B. Recliner Frame Style - Refer to Removing/Installing the Rear Wheels on page 53.
5. Adjust anti-tippers according to new seat-to-floor height. Refer to adjusting the anti-tippers in section 8 of this manual.

## Non-Recliner Frame Style

### **⚠ WARNING**

**20-22 Wide (300 lb. weight limitation) Wheelchairs only: 8 x 1<sup>3</sup>/<sub>4</sub> inch semi-pneumatic front casters **MUST** be installed. **DO NOT** replace with any other size/style front caster. Otherwise, injury or damage may occur.**

#### **\*6-INCH FRONT CASTERS**

## SECTION 11—RECLINER

---

### **WARNING**

After any adjustments, repair or service and before use, make sure all attaching hardware is tightened securely. Otherwise injury or damage may occur.

---

## Recliner Operation

---

### **WARNING**

**ALWAYS** make sure that the wheelchair is stable in the full reclined (back at 180°) position and the full upright (back at 90°) position **BEFORE** using the recliner option.

Anti-tippers **MUST BE** attached at all times.

**ALWAYS** engage both wheel locks while reclining or inclining (reverse recline) the wheelchair.

Make sure spring buttons of the spreader bar fully protrude out through the hole in the handle before using the wheelchair.

Make sure both back canes are at the same angle before releasing the handles of the recline mechanisms.

Mount the rear wheels in the Rear Wheel Offset Bracket only. **NEVER** reposition the rear wheels to the forward position, stability of the wheelchair will decrease.

Before using the recliner option, the anti-tippers **MUST** be installed and properly adjusted. Refer to Installing/Adjusting the Anti-tippers in Section 8 of this manual.

**ALWAYS** return the back to the upright position before lifting the wheelchair.

### **TO HEALTHCARE PROFESSIONALS/ASSISTANTS:**

The Tracer SX5 Recliner wheelchair **MUST** be operated by a healthcare professional or assistant when in any reclined position.

Make sure the patient is properly positioned in the wheelchair before reclining or inclining (reverse recline) to maintain maximum stability and safety.

Assistants **MUST** be prepared to support the weight of the occupant when reclining, or returning the occupant of the wheelchair to the full upright position. Make sure to use proper body mechanics (use your legs) or seek assistance if necessary to avoid injury.

**ALWAYS** engage both wheel locks while reclining or inclining (reverse recline) the wheelchair.

Make sure occupant's and bystanders' hands and body are clear of all pinch points before reclining back. Use caution, otherwise injury may occur.

---

*NOTE: For this procedure, refer to FIGURE 11.1 on page 49.*

1. Unfold wheelchair. Refer to Unfolding and Folding Wheelchair on page 20.
2. Attach spreader bar. Refer to Removing/Installing the Spreader Bar on page 51.
3. Make sure wheelchair is occupied and on a level surface before reclining.
4. Engage the wheel locks.
5. Inform the occupant of the wheelchair that the wheelchair is about to be reclined.
6. Make sure occupant's hands and body are clear of all pinch points.
7. Stand behind the wheelchair and grasp both push handles firmly.
8. Lifting up on handles, squeeze release levers.
9. Slowly, pull back on the back assembly while squeezing the release levers.
10. When the back reaches the desired angle, slowly let go of the release levers.
11. To return the back to the full upright position, reverse the STEPS 7-10 keeping in mind proper body mechanics.

**FIGURE 11.1** Recliner Operation

## Replacing the Headrest Pillow

*NOTE: For this procedure, refer to FIGURE 11.2 on page 50.*

1. Unfasten straps of headrest pillow from behind headrest upholstery.
2. Remove existing headrest pillow from headrest.
3. Center new/existing headrest pillow onto the front of the headrest upholstery.
4. Pull straps of new/existing headrest pillow around the back canes.
5. Pressing firmly, attach the fastening strips of the new/existing headrest pillow to the fastening strips on the back of the headrest upholstery.

**FIGURE 11.2** Replacing the Headrest Pillow

## Replacing the Headrest/Back Upholstery

*NOTE: For this procedure, refer to FIGURE 11.3 on page 51.*

### Headrest Upholstery

1. Remove the headrest pillow. Refer to Replacing the Headrest Pillow on page 49.
2. Remove the six mounting screws that secure the headrest upholstery to the headrest extension tubes.
3. Secure new headrest upholstery onto headrest extension tubes with the existing six mounting screws.
4. Install headrest pillow. Refer to Replacing the Headrest Pillow on page 49.

### Back Upholstery

1. Disengage one side of the spreader bar. Refer to Removing/Installing the Spreader Bar on page 51.

*NOTE: To remove and install the bottom two mounting screws of the back upholstery the wheelchair MUST be partially folded. Refer to Unfolding and Folding Wheelchair on page 20.*

2. Remove the twelve mounting screws that secure the back upholstery to the back canes.
3. Secure new back upholstery to back canes with the existing twelve mounting screws. Securely tighten.
4. Reengage spreader bar. Refer to Removing/Installing the Spreader Bar on page 51.

**FIGURE 11.3** Replacing the Headrest/Back Upholstery

## Removing/Installing the Spreader Bar

*NOTE: For this procedure, refer to FIGURE 11.4 on page 52.*

### **⚠ WARNING**

**Make sure both release buttons of the spreader bar fully protrude out through the holes in the handle **BEFORE** using the wheelchair.**

### Removing

1. Push in release button on one side of existing spreader bar.
2. While holding spreader bar, pull the lock tube until the release button is out of the handle of the back cane.
3. Drop the spreader bar to one side.
4. Repeat STEPS 1-2 on opposite end of spreader bar.

### Installing

1. Push in release button on one of the lock tubes of the new/existing spreader bar.
2. Insert lock tube into the handle of the back cane.
3. Ensure the release button fully protrudes out of the hole in the back cane handle.
4. Repeat STEPS 1-3 on opposite end of spreader bar.

**FIGURE 11.4** Removing/Installing the Spreader Bar

## Removing and Installing Armrest

---

### **⚠ WARNING**

**Make sure the armrest is securely locked before using the wheelchair.**

---

*NOTE: For this procedure, refer to FIGURE 11.5 on page 53.*

### Removing Armrest

1. Push down on armrest to ensure it is fully seated in front and rear sockets.
- NOTE: This step is needed to prevent the release buttons from hanging up on the sockets.*
2. Unlock the rear armrest by rotating the armrest release lever towards the outside of the wheelchair.
  3. Press IN the armrest release buttons at the front of the armrest.
  4. While pressing in the armrest release button, remove the armrest from the arm sockets by pulling straight up.

### Installing Armrest

*NOTE: Rear armrest release lever MUST be in the unlocked position when installing the armrest.*

1. Position the armrest just above the front and rear arm sockets.
2. Push arm down evenly at the front and rear until the front armrest release button snaps into the front arm socket.
3. Lock rear armrest by turning the armrest release lever towards the back of the wheelchair.
4. Ensure armrest is locked securely in the arm sockets by gently lifting up. If not locked, repeat STEPS 1-3.

**FIGURE 11.5** Removing and Installing Armrest

## Removing/Installing the Rear Wheels

*NOTE: For this procedure, refer to FIGURE 11.6 on page 54.*

---

### **⚠ WARNING**

If changing the size of the rear wheel or a change in the Seat-to-Floor Height is desired, this procedure **MUST** be performed by a qualified technician.

Ensure both rear wheels are the same size before using.

**Tracer SX5 recliner ONLY: Mount the rear wheels in the Rear Wheel Offset Bracket ONLY. NEVER reposition the rear wheels to the forward position, as stability of the wheelchair will decrease, and injury or damage may result.**

---

### Removing

1. Note mounting position of existing rear wheel.
2. Remove the axle mounting screw and locknut that secure the existing rear wheel and spacer to the wheel offset bracket.
3. Remove the existing rear wheel from wheel offset bracket.

### Installing

1. Secure the new/existing rear wheel and spacer to wheel offset bracket with axle mounting screw and locknut. Torque locknut to 40 in-lbs.

**FIGURE 11.6** Removing/Installing the Rear Wheels

## Using/adjusting the Clamp-On Wheel Locks

### Using the Clamp-On Wheel Locks

*NOTE: For this procedure, refer to FIGURE 11.7.*

#### **⚠ WARNING**

**DO NOT attempt to stop a moving wheelchair with the wheel locks. WHEEL LOCKS ARE NOT BRAKES.**

*NOTE: The Tracer SX5 Recliner with 24-inch rear wheels uses the disk wheel locks. Refer to Using/Adjusting Patient Operated Wheel Locks on page 43.*

1. Ensure the wheelchair is not moving before engaging the wheel locks.
2. To engage, push the wheel lock handle forward.
3. Disengage the wheel locks by reversing STEP 2.

**FIGURE 11.7** Using/adjusting the Clamp-On Wheel Locks - Using the Clamp-On Wheel Locks

## Adjusting the Clamp-On Wheel Locks

*NOTE: For this procedure, refer to FIGURE 11.8.*

*NOTE: If wheels are pneumatic, before adjusting or replacing the wheel lock assemblies, ensure that the tires are inflated to the recommended psi on the side wall of tire.*

1. Disengage the wheel locks.
2. Loosen the bolt and locknut that secure the wheel lock to the wheelchair frame.
3. Reposition the wheel lock so that when engaged, the wheel lock shoe embeds the tire 1/8-inch (3/16-inch for pneumatic tires) and holds the occupied wheelchair in place when pushed.
4. Securely tighten the bolt and locknut or socket screws securing the wheel lock to the wheelchair frame.
5. Engage the wheel lock.
6. Measure the distance the wheel lock is embedded into the tire as shown in DETAIL "A" of FIGURE 11.8.

*NOTE: Any wheel lock adjustment should embed the wheel lock shoe at least 1/8-inch (3/16-inch if pneumatic tire) into the tire when engaged.*

7. Repeat STEPS 1-6 until the wheel lock shoe embeds the tire 1/8-inch (3/16-inch for pneumatic tires) and holds the occupied wheelchair in place when pushed.
8. Repeat STEPS 1-7 for the opposite wheel lock.
9. Engage both wheel locks and ensure the occupied wheelchair is held in place when pushed.

### **⚠ WARNING**

**If wheel locks DO NOT hold the occupied wheelchair in place contact a qualified technician.**

**FIGURE 11.8** Using/adjusting the Clamp-On Wheel Locks - Adjusting the Clamp-On Wheel Locks

## SECTION 12—OPTIONS

### **WARNING**

**After any adjustments, repair or service and before use, make sure all attaching hardware is tightened securely. Otherwise injury or damage may occur.**

### Installing Amputee Bracket

*NOTE: For this procedure, refer to FIGURE 12.1 on page 57.*

1. Refer to the following chart or FIGURE 12.1 to determine the mounting position of the amputee bracket:

SEAT-TO-FLOOR	*BRACKET	AXLE SPACER POSITION (ON BRACKET)	SIDE OF WHEELCHAIR	AXLE MOUNTING POSITION (ON WHEELCHAIR)
ADULT	A	DOWN	RIGHT	TOP
ADULT	B	DOWN	LEFT	TOP
HEMI	B	UP	RIGHT	BOTTOM
HEMI	A	UP	LEFT	BOTTOM

*\*NOTE: "A" and "B" are stamped on the sides of the amputee bracket.*

2. Install the amputee bracket on the wheelchair frame to the position determined in STEP 1.

*NOTE: Make sure the axle spacer is pointing towards the outside of the wheelchair.*

3. Install the two hex screws and locknuts that secure the amputee bracket to the wheelchair.
4. Install the rear wheels onto the wheelchair. Refer to Removing/Installing Rear Wheels on page 37.

**FIGURE 12.1** Installing Amputee Bracket

## Installing Crutch and Cane Carrier

### **⚠ WARNING**

Check base weekly to ensure proper placement.

When loading the crutch/cane carrier, ensure items are securely placed into the base. Also ensure that there is no interference with folding the wheelchair, the rear wheels, or the swing-back arms.

Strap **MUST** be securely fastened while carrying items.

**NEVER** insert or remove items while wheelchair is moving.

*NOTE: For this procedure, refer to FIGURE 12.2 on page 58.*

1. Slide the clamp with the base attached over the end of the step tube of the wheelchair. Ensure the base is towards the inside of the wheelchair.
2. Position the base parallel to the step tube.

### **CAUTION**

Base should be parallel to step tube to avoid bending spokes when folding the wheelchair.

3. Securely tighten the locknut that secures the base to the step tube of the wheelchair.
4. Remove the upper back upholstery screw and washer.
5. Align the strap with the back upholstery screw mounting hole.
6. Reinstall the back upholstery screw and washer and secure the strap to the wheelchair.
7. The base cleans easily with any chrome or glass cleaner. The strap can be cleaned with mild soap and water.

**FIGURE 12.2** Installing Crutch and Cane Carrier

## Installing the Seat Positioning Strap

### **⚠ WARNING**

**ALWAYS** wear your positioning strap. Inasmuch as the **Seat Positioning Strap** is an option on this wheelchair (You may order with or without the seat restraint), Invacare strongly recommends ordering the **Seat Positioning Strap** as an additional safeguard for the wheelchair user.

*NOTE: For this procedure, refer to FIGURE 12.3.*

1. Remove the bottom back upholstery screw from the wheelchair.
2. Position the seat positioning strap half between the back cane and back upholstery.
3. Secure the back upholstery and seat positioning strap to the wheelchair with the existing back upholstery screw.
4. Repeat STEPS 1-3 for the opposite side of the wheelchair.

**FIGURE 12.3** Installing the Seat Positioning Strap

# LIMITED WARRANTY

**PLEASE NOTE: THE WARRANTY BELOW HAS BEEN DRAFTED TO COMPLY WITH FEDERAL LAW APPLICABLE TO PRODUCTS MANUFACTURED AFTER JULY 4, 1975.**

This warranty is extended only to the original purchaser who purchases this product when new and unused from Invacare or a dealer. This warranty is not extended to any other person or entity and is not transferable or assignable to any subsequent purchaser or owner. Coverage under this warranty will end upon any such subsequent sale or other transfer of title to any other person.

This warranty gives you specific legal rights and you may also have other legal rights which vary from state to state.

Invacare warrants the side frames and cross members of this product when purchased new and unused to be free from defects in materials and workmanship for a period of five (5) years from the date of purchase from Invacare or a dealer, with a copy of the seller's invoice required for coverage under this warranty. Invacare warrants the upholstered materials (seat, back and armrests of the arm assembly) and remaining components of this product when purchased new and unused to be free from defects in materials and workmanship for a period of thirteen (13) months from date of purchase from Invacare or a dealer, with a copy of the seller's invoice required for coverage under this warranty. If within such warranty periods any such product shall be proven to be defective, such product shall be repaired or replaced, at Invacare's option. This warranty does not include any labor or shipping charges incurred in replacement part installation or repair of any such product. Invacare's sole obligation and your exclusive remedy under this warranty shall be limited to such repair and/or replacement.

For warranty service, please contact the dealer from whom you purchased your Invacare product. In the event you do not receive satisfactory warranty service, please write directly to Invacare at the address at the bottom of this page. Provide dealer's name, address, the product model number, date of purchase, indicate nature of the defect and, if the product is serialized, indicate the serial number. Do not return products to our factory without our prior consent.

**Limitations and Exclusions:** The foregoing warranty shall not apply to serial numbered products if the serial number has been removed or defaced, products subjected to negligence, accident, improper operation, maintenance or storage, products modified without Invacare's express written consent including, but not limited to, modification through the use of unauthorized parts or attachments; products damaged by reason of repairs made to any component without the specific consent of Invacare, or to a product damaged by circumstances beyond Invacare's control, and such evaluation will be solely determined by Invacare. The warranty shall not apply to normal wear and tear or failure to adhere to the product instructions.

**THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IN LIEU OF ANY OTHER WARRANTIES WHATSOEVER, WHETHER EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, AND THE SOLE REMEDY FOR VIOLATIONS OF ANY WARRANTY WHATSOEVER, SHALL BE LIMITED TO REPAIR OR REPLACEMENT OF THE DEFECTIVE PRODUCT PURSUANT TO THE TERMS CONTAINED HEREIN. THE APPLICATION OF ANY IMPLIED WARRANTY WHATSOEVER SHALL NOT EXTEND BEYOND THE DURATION OF THE EXPRESS WARRANTY PROVIDED HEREIN. INVACARE SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES WHATSOEVER.**

**SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGE, OR LIMITATION OF HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE EXCLUSION AND LIMITATION MAY NOT BE APPLICABLE.**

**THIS WARRANTY SHALL BE EXTENDED TO COMPLY WITH STATE/PROVINCIAL LAWS AND REQUIREMENTS.**

***Yes, you can.®***
