

The average annual per capita paper use in the USA in 2001 was 700 pounds. The average annual per capita paper use in the rest of the world was 110 pounds. This is equal to approximately 28 print outs per day every day. Excessive use of paper wastes landfill space, water, chemicals and the energy resources required to recycle the paper. Join TiLite in its efforts to reduce paper use by filling out this order form online and sending it via email.
