

What is TENS?

TENS (Transcutaneous Electrical Nerve Stimulation) is a non-invasive and drug-free method of controlling pain by the transmission of electrical stimulation to the body's nerve or muscle fibers through the skin. Pain relief or suppression is achieved by: Suppressing the transmission of pain in nerves (Gate Control Theory) and Increasing the discharge of the body's endorphins, which reduces the sensitivity to pain in the central nervous system (Opiate Release Theory). The Hollywog® WiTouch's exclusive and patented wave-form incorporates BOTH clinical theories of TENS to provide pain relief. The Hollywog WiTouch provides a safe, easy to apply, FDA-cleared treatment for low back pain.

Take **CONTROL** of
your **BACK PAIN**
and take control of
YOUR LIFE.

WiTouch™

The World's First True Wireless TENS for Back Pain

Introducing the Hollywog® WiTouch™ device.

Take **CONTROL** of
your **BACK PAIN**
and take control of
YOUR LIFE.

Hollywog WiTouch is the first wireless remote controlled pain relief device incorporating TENS technology to specifically target back pain. The thin and flexible design perfectly contours the back for maximum surface contact. Advanced electronic design maximizes energy use providing over 150 30-minute treatment sessions per battery life. This innovative device is safe, drug-free, easy to use, discreet & comfortable to wear, and most importantly allows you to control your pain to maintain an active lifestyle.

- ◎ Drug-Free with no side effects
- ◎ Thin, lightweight and flexible design perfectly contours the back for maximum surface contact
- ◎ Comfortable & discreet - wear under your clothing for hours of pain relief when you need it
- ◎ No wires, bulky back wraps or belts
- ◎ Portable & convenient for travel
- ◎ Over 150 30-minute treatments before changing batteries
- ◎ Replaceable Gel Pads for multiple back pain relief applications
- ◎ As powerful as professional equipment
